

QA Engineer

Stonebranch builds dynamic IT automation solutions that transform business IT environments from simple IT task automation into sophisticated, real-time business service automation, helping organizations achieve the highest possible Return on Automation. No matter the degree of automation, Stonebranch software is simple, modern and secure. Using its universal automation platform, enterprises can seamlessly orchestrate workloads and data across technology ecosystems and silos. Headquartered in Alpharetta, Georgia with points of contact and support throughout the Americas, Europe, and Asia, Stonebranch serves some of the world's largest financial, manufacturing, healthcare, travel, transportation, energy, and technology institutions.

The candidate will join our Technology Department in Skopje, a DevOps and Digital-Services lab, focusing in providing innovative solutions to our customers leveraging on opensource frameworks and solutions. The position is related to a new business domain within Stonebranch which has a direct impact on the growth and adoption of our Universal Automation Platform.

Your Part in this Growth Story:

Stonebranch Marketplace is evolving enabling our customers who build DevOps , DataOps and any type of IT orchestration to integrate with any cloud services and cutting-edge applications such as GitHub, Kafka, Elastic, Terraform, Kubernetes, Docker, Databricks, Snowflake, Slack, Jenkins to name a few.

Stonebranch TES BU is searching for a **QA Engineer** who is interested in playing an important part in our company by being responsible for conducting tests before product launches to ensure software runs smoothly and meets client needs.

What you will be doing:

- You will prepare test specification according to software requirements.
- You will troubleshoot complex software products through the use of systematic tests to develop, apply and maintain quality standards for company products.
- You will design, code and execute automated test scripts.
- You will prepare reports and documentation updates.
- You will meet team and company targets, by working collaboratively and establishing fruitful and joyful communication with your peers.

What You Will Bring to the Team:

- BS/MS degree in Computer Science, Engineering or a related subject.
- 1+ years of test automation experience.
- Experience with Python is strongly preferred.
- Experience with test framework Robot Framework and Selenium.
- Experience with Jenkins.

- Experience using configuration management tools such as Jira, in addition to experience using Git.
- Experience with Windows & Linux/Unix platforms.
- Experience with database technology such as Oracle, MySQL, and/or PostgreSQL.
- Experience with web services (SOAP and REST), SQL, XML.
- Experience with Docker is a plus.
- Interpersonal skills and appreciation of other people's work discipline.
- Excellent written and verbal communication (English).
- Ego-free attitude — we are here for the success of the Team.

Why You'll Love Stonebranch:

- Competitive compensation
- Health insurance
- Great company culture
- Regular social events
- Work in a motivated, experienced, and international team of top performers
- Continuous professional development
